BENEDICTION	THE REV. CLARENCE C. SILVESTER

This school building, the product of the fine vision of the board of school directors, the careful planning of the administrative officers, the technical skill and good taste of the architects, and the faithful performance of the several contractors, is tonight dedicated as a Junior High School for the youth of these adjacent communities

In this building, under the leadership of competent and devoted teachers, the fields of human knowledge, skill, and experience will be explored in order that these boys and girls may wisely choose the service by which their lives shall have purpose and meaning.

May this building so dedicated continue to reflect the high purposes for which it was built and be for all time a blessing to the people which it serves.
